## CONTENTS

**Peter Cook**
Preface .......................................................................................................................... 675

**Joanne Lessard and Alan Campbell**
Describing northern abalone, *Haliotis kamtschatkana*, habitat: Focusing rebuilding efforts in British Columbia, Canada ........................................ 677

**Darren S. James, Rob W. Day and Scoresby A. Shepherd**
Experimental abalone ranching on artificial reef in Port Phillip Bay, Victoria .................................................. 687

**Rodney D. Roberts, Elizabeth F. Keys, Gerard Prendergill and Conrad A. Pilditch**
Viability of abalone (*Haliotis iris*) stock enhancement by release of hatchery-reared seed in Marlborough, New Zealand ................................ 697

**Roberto A. Flores-Aguilar, Alfonso Gutiérrez, Andrés Ellwanger and Ricardo Searcy-Bernal**
Development and current status of abalone aquaculture in Chile ........................................................................ 705

**Jerry V. Kashiyada and Ian K. Taniguchi**
Application of recent red abalone *Haliotis rufescens* surveys to management decisions outlined in the California Abalone Recovery and Management Plan .......................................................... 713

**Laura Rogers-Bennett, Donald W. Rogers and Steven A. Schultz**
Modeling growth and mortality of red abalone (*Haliotis rufescens*) in Northern California ........................................ 719

**Sabine Daume, Mark Davidson, Stephen Ryan and Fiona Parker**
Comparisons of rearing systems based on algae or formulated feed for juvenile greenlip abalone (*Haliotis laevigata*) ........................................ 729

**Lachlan W. S. Strain, Andreas Isdepsky, Michael A. Borowitza and Sabine Daume**
Three algal propagation methods assessed to create a rhodophyta diet for juvenile greenlip abalone (*Haliotis laevigata*) in the later nursery phase ........................................................................ 737

**Rodney D. Roberts, Niels Peter Rersbach and Lars Ris Damgaard**
Effect of water velocity and benthic diatom morphology on the water chemistry experienced by post-larval abalone ........................................ 745

**Fiona Parker, Mark Davidson, Kytrin Freeman, Sam Hair and Sabine Daume**
Investigation of optimal temperature and light conditions for three benthic diatoms and their suitability to commercial scale nursery culture of abalone (*Haliotis laevigata*) ........................................ 751

**Luis Pereira, Tatiana Rigueime and Hidetuyyo Hosokawa**
Effect of three photoperiod regimes on the growth and mortality of the Japanese abalone *Haliotis discus hannai* Ino ........................................ 763

**Luis Pereira and Salvador Rasse**
Evaluation of growth and survival of juveniles of the Japanese abalone *Haliotis discus hannai* in two culture systems suspended in tanks ........................................................................ 769

**Luis Pereira, José Lagos and Fernando Araya**
Evaluation of three methods for transporting larvae of the red abalone *Haliotis rufescens* Swainson for use in remote settlement ........................................ 777

**Ricardo Searcy-Bernal, Esteban Pérez-Sánchez, Casandra Anguiano-Beltrán and Roberto Flores-Aguilar**
Metamorphosis and postlarval growth of abalone *Haliotis rufescens* in a Mexican commercial hatchery ........................................ 783

**Ricardo Searcy-Bernal and Eréndira Gorrostieta-Hurtado**
Effect of darkness and water flow rate on survival, grazing and growth rates of abalone *Haliotis rufescens* postlarvae ........................................ 789

**Casandra Anguiano-Beltrán and Ricardo Searcy-Bernal**
Effects of antibiotics on the concentration of bacteria in biofilms and on the growth of *Haliotis rufescens* postlarvae ........................................ 795

**L. Badillo, M. Segoria and Ricardo Searcy-Bernal**
Effect of two stocking densities on the growth and mortality of the pink abalone *Haliotis corrugata* in recirculating and flow-through systems ........................................................................ 801

**Jinghua Fu, Wenbing Zhang, Kangsen Mai, Xiaon Feng, Wei Xu, Zhiguo Liu, Hongming Ma and Qinghui Ai**
Effects of vitamin E on antioxidant enzyme activities and fatty acid compositions in juvenile abalone *Haliotis discus hannai* Ino ........................................ 809

**Kangsen Mai, Wei Zhu and Getian Wu**
Pyridoxine requirement of juvenile abalone, *Haliotis discus hannai* Ino ........................................ 815

**P. D. Kube, S. A. Appleyard and N. G. Elliott**
Selective breeding greenlip abalone (*Haliotis laevigata*): Preliminary results and issues ........................................ 821

**Cristian Gallardo-Escárate and Miguel Ángel del Río-Portilla**
Karyotype composition in three California abalones and their relationship with genome size ........................................ 825

**S. A. Martin, P. A. Hayes, S. Marchant and F. M. Winkler**
Molecular markers used to analyze species-specific status in abalones with ambiguous morphology ........................................ 833

**José Luis Gutiérrez-González, Pedro Cruz, Miguel Ángel del Río-Portilla and Ricardo Perez-Enríquez**
Genetic structure of green abalone *Haliotis fulgens* population off Baja California, Mexico ........................................ 839

CONTENTS CONTINUED ON INSIDE BACK COVER
G. Courtois de Viço, M. P. Viera, A. Bilbao and M. S. Izquierdo
Embryonic and larval development of Haliotis tuberculata coccinea Reeve: An indexed micro-photographic sequence ........... 847

N. Rozbaczylo, F. Avilés, M. Herre and M. Godoy
First report of Dodecaceria sp. (Polychaeta: Cirratulidae), in red abalone in Chile ................................................................. 855

Fabian Avilés, Nicolas Rozbaczylo, Marcos Godoy and Gerardo Muñoz
The first report of Phoronis sp. (Phoronida), in red abalone (Haliotis rufescens) in Chile ............................................................. 859

Fabian Avilés, Nicolas Rozbaczylo, Marcelo Herre and Marcos Godoy
First report of polychaetes from the genus Oriopsis (Polychaeta: Sabellidae) associated with the Japanese abalone
Haliotis discus hannai and other native molluscs in Chile ............................................................................................................. 863

James D. Moore, Christy I. Juhasz, Thea T. Robbins and Edwin D. Grosholz
The introduced sabellid polychaete Terebrasabella heterouncinata in California: Transmission, methods of control and survey for presence in native gastropod populations .......................................................................................................................... 869

Carolyn S. Friedman, Benjamin B. Scott, Robyn Estes Strenge, Brent Vadopalas and Thomas B. McCormick
Oxytetracycline as a tool to manage and prevent losses of the endangered white abalone, Haliotis sorenseni, caused by withering syndrome ................................................................................................................................. 877

Stephanie Auzoux-Bordenave, Martine Fouchereau-Peron, Marie-Noëlle Hélécourt and Dominique Doumenc
CGRP regulates the activity of mantle cells and hemocytes in abalone primary cell cultures (Haliotis tuberculata) ...................... 887
